Herbarium Antique Grasscloth Wallpaper

Herbarium Antique pays tribute to the art and wisdom of herbalism. Hand-drawn leaves and blossoms are layered over rich Victorian-inspired backgrounds in forest green, antique gold, silvery greys, and deep blue. This wallpaper blends natural beauty with historical richness, creating a thoughtful and moody backdrop for kitchens, studies, or wellness spaces.

SUSTAINABILITY

- Natural and Renewable Materials: Our grasscloth wallcoverings are made from natural seagrass fibres. These fibres are renewable resources, as they come from plants that can be replanted and harvested sustainably.
 - Grasscloth wallcoverings are biodegradable, meaning they can naturally break down over time without causing harm to the environment. They can also be composted, reducing waste and landfill burden.
- Low VOC and Non-Toxic: Many grasscloth wallcoverings are manufactured using water-based adhesives and inks with low volatile organic compound (VOC) content. This reduces indoor air pollution and improves indoor air quality, making it healthier for occupants.
- No PVC or Vinyl: Grasscloth wallcoverings are generally free from PVC (polyvinyl chloride) and vinyl, which are materials commonly found in traditional wallcoverings. Avoiding PVC and vinyl reduces the use of harmful chemicals and synthetic materials.

BATCHING & DELIVERY

- Note: Samples of this wallcovering are provided for review of the material, pattern scale and print technique – they are not intended to be used for colour matching purposes. There can be slight shifts in colour between runs, so your wallcovering may vary slightly from sample colouring.
- Please ensure that you order the correct amount as we do not guarantee that rolls printed in different batches will be an exact match.
- Industry leading production times on all orders.

Grasscloth wallcoverings can be used in residential, commercial and hospitality interior design projects to add features with natural and specialty materials. Combined with superior customer support and quick delivery times.

Natural resource wallcovering important considerations

- Anti-microbial features Grasscloth wallcoverings contain bactericides and mildew inhibitors to discourage the growth of mold and mildew under normal conditions.
- Paste-The-Paper Made from natural fibres, these wallcoverings will
 expand when adhesive is applied. Simply apply the paste directly to the
 back of the paper—be generous, but avoid using excessive paste. Allow
 for booking time, as the wallcovering will expand slightly during this
 period before hanging.
- Book the wallcovering "Booking" is a process where you fold the
 pasted sides of the wallcovering together, adhesive-to-adhesive, with
 the pasted side facing inwards. This allows the paste to activate and
 helps prevent it from drying out before you hang the wallcovering.
 Leave the booked wallcovering a few minutes.
- The wallcovering rolls are finished precisely to have no overlap.
 Meaning the panels simply butt up to each other for ease of installation.
- Spongeable Dirt, dust, and other marks can be cleaned with a slightly damp sponge (do not use any solvents).
- Wet removal is a common method for removing grasscloth & natural wallcovering. However, because grasscloth is made from natural materials, it can be delicate and requires a bit of extra care during the removal process to avoid damaging the walls.
